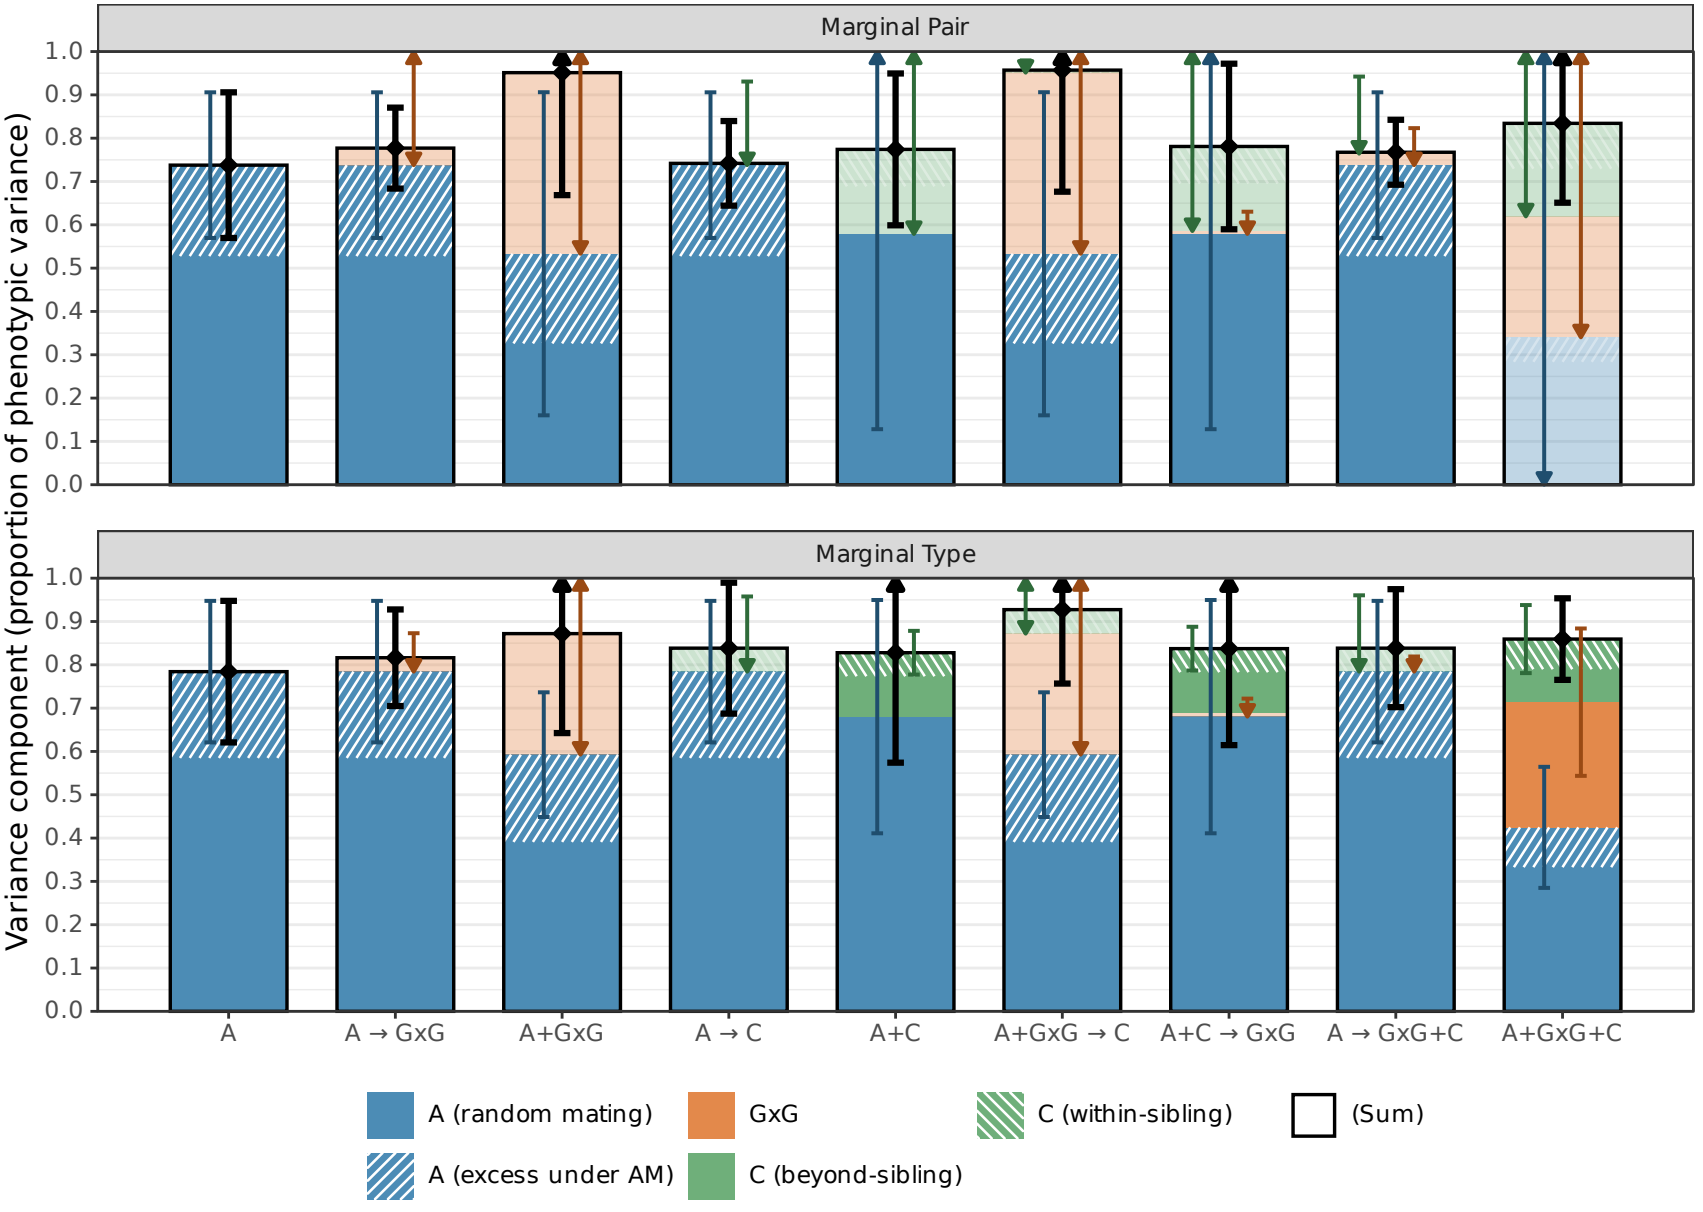
# Core models: variance components


Black outline and diamond: sum of the components, with its 95% Marginal Type CI (black, centre)
Coloured: each component's 95% Marginal Type CI, at the top of its segment
A: random-mating part (solid) + excess under assortative mating (striped); CI for the total
C: beyond-sibling part (solid) + within-sibling part (striped); CI for the total
Faded: the component's CI includes 0. Arrowhead: the CI runs past [0, 1]
