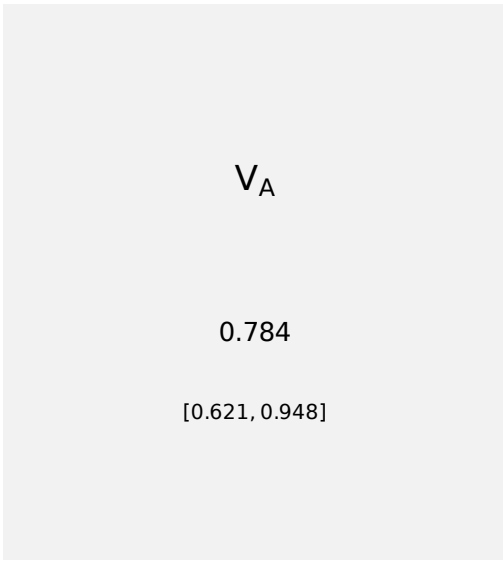
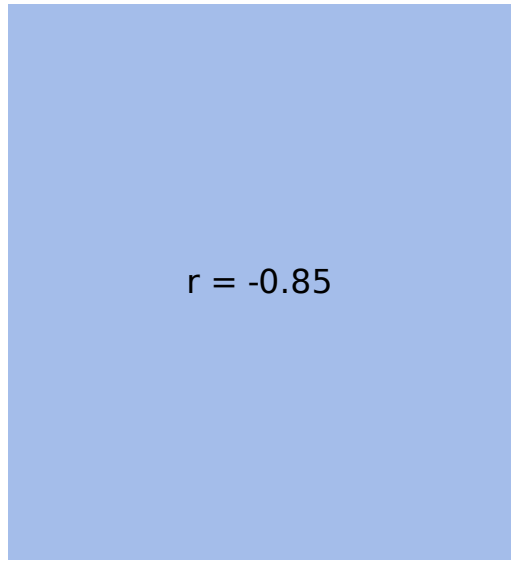
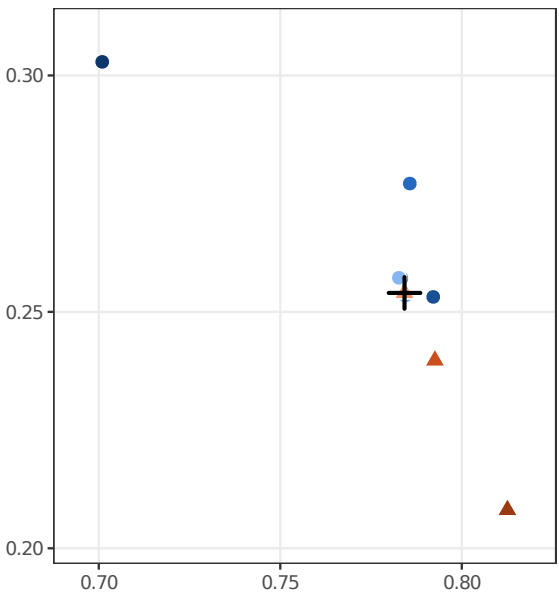
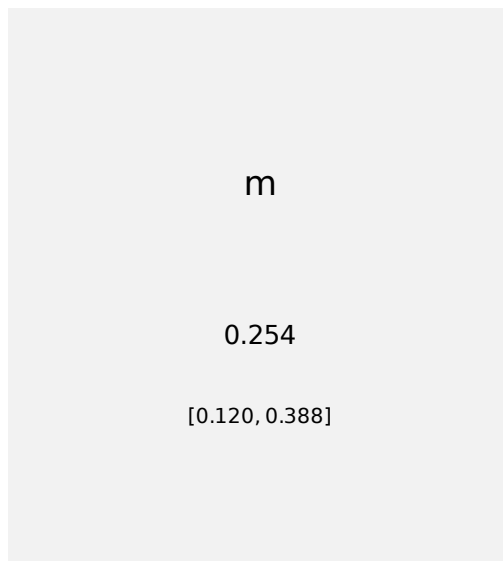
A: parameter sampling correlations (Marginal Type)









twins
1st cousins
step-sibs
adoptive cousins
full-sibs
half cousins
co-cousins
half-sibs
2nd cousins
adoptive sibs

Lower: leave-one-type-out refit estimates (axes zoomed on them); black cross = full-data estimate.
Upper: jackknife correlation of the two estimates (correlation of the refits).
Diagonal: estimate and 95% Marginal Type CI.
